

TruEarz™

Filtered Earplugs

Stay Protected and Connected

Revolutionize your listening experience in noise

TruEarz™ earplugs combine the comfort of Comply™ foam eartips with CavCom's filter technology. CavCom offers multiple filter options so you can choose the filter that's right for many work environments (high noise, moderate noise or workers who are in and out of high noise frequently). Our specially-designed acoustic filters reduce sounds evenly across a wide frequency range. This provides an enhanced listening experience enabling workers to have face-to-face conversations and hear important work signals, even in high noise. The reusable universal foam eartips and replaceable filters provide versatility for years of use.

Comply™ is a registered trademark of Hearing Components, Inc.

Features

- Reusable and replaceable Comply™ foam eartips available in S/M/L
- Easy insertion/removal
- Multiple filter options
