- Up to NRR 32

## Talk Through Your Ears® Technology for High Noise and Respirator Environments

Radio communications aren't a luxury – they're often a necessity, usually in the most hazardous environments known to exist. If you deal with HIGH NOISE and/or wear a RESPIRATOR then you likely struggle with communications. CavCom's **Talk Through Your Ears®** technology ingeniously combines hearing protection (up to NRR 32) with in-ear microphone and speakers for seamless voice communication, regardless of noise or PPE. Choose between custom fit or universal style earpieces to fit your specific needs – use your existing radio. 'Talk Through Your Ears,' not your NOISE!

**Protect:** (up to) NRR 32; ideal for double hearing protection requirements.

**Listen:** volume limited speakers deliver the safest and clearest radio audio to both ears.

**Talk:** earpiece microphone transmits voice from inside the ear canal for clear speech in HIGH NOISE and while wearing RESPIRATORS.
