

# ClearTalk™ Voice Amplifier

Featuring *Talk Through Your Ears®* Technology

**Speak comfortably,  
and be heard,  
wearing any PPE**

## In-Ear Microphone Delivers Clear Speech, Regardless of PPE

Clear communication is critical to the work you do. And face masks, respirators, PAPRs or other PPE can dramatically affect your ability to be heard and understood. Healthcare professionals and engineers at CavCom have paired our award-winning in-ear microphone technology with an easy to use personal voice amplification unit. These earpieces pick up a normal tone of voice in your ear canal, so speech clarity is not affected by wearing face masks, respirators or other PPE. Listeners hear your speech clearly and with a boost in volume from the small body-worn amplifier.

**In-Ear  
Microphone**

**Compatible  
with any PPE**

**Use with  
any suit**

**Lightweight &  
portable**

**Easily  
Sanitized**

**Multiple  
Earset Styles**

## Clear communication, regardless of PPE.

### ClearTalk™ Earpiece

- Microphone located in the earpiece
- Low-profile for compatibility with other PPE
