

EarzON[®] Metal Detectable

CavCom's EarzON[®] line of custom earplugs offers a variety of effective hearing protection options for the food industry and other manufacturing operations requiring strict protocols to prevent product contamination. Noise reduction values can be tailored to the noise levels in your work environment. CavCom offers two options for detectable custom hearing protectors: an acrylic earplug with metal BB and now our **NEW metal detectable silicone EarzON[®]**.

FULLY DETECTABLE CUSTOM EARPLUG AND LANYARD

Our innovative silicone contains special additives that alert in most metal detector scanning equipment and are visible in traditional X-ray units. Better yet, users experience the same level of comfort and noise protection you've come to expect from CavCom custom products. And to complete the offering, our new earplug retention cord is also metal detectable in its own right.

BENEFITS

- Help reduce product recalls and waste
- Prevent operational down time and added cost
- Support product purity and improved shelf-life of products

FEATURES

- Multiple NRRs available to avoid overprotection: NRR11 (Lite Filter), NRR19 (HiFi Filter), NRR26 (Solid)
- Metal detectable retention cord
- Digital laboratory manufacturing:
 - No expiration date on ear impressions or earplug
 - Quick turn around (typically 3-4 weeks)
 - Easy replacement (no new impression required)

"I AM AMAZED AT THE LEVEL OF SOUND PROTECTION AND THE COMFORT OF THE EARPLUGS, ALLOWING FOR ALL-DAY WEAR. "

90-day Fit Guarantee!

Material samples available for detection testing.
