ALL-NEW TALK THROUGH YOUR EARS® 7000 COMMUNICATION EARSETS

Connect to smart radios, phones, duplex devices, WiFi handsets, and more

THE TALK THROUGH YOUR EARS® 7000 ADVANTAGE

Designed for the most challenging work environments, *Talk Through Your Ears®* provides clear communication in high noise conditions and when personal protective equipment (PPE) covering the mouth makes speech communication difficult. Workers in hearing critical situations can find their challenges magnified by such PPE as respirators, facemasks, safety glasses, PAPR hoods, helmets and protective suits. When the microphone is in the ear, it doesn't matter how much gear covers your head and mouth – the speech is always clear and consistent. Weighing less than 8 ounces, *Talk Through Your Ears® 7000* is a welcome alternative to bulky headsets with boom microphones.

Now available, *Talk Through Your Ears® 7000* is a smart choice for your smart radio.

- Microphone and speakers located in earpieces
- Microelectronics provide enhanced speech clarity
- Dual ear listening maximizes intelligibility
- Low-profile for compatibility with other PPE
- Choose custom molded or universal fit earpieces
- Hearing protection options (NRR 11 to 29)
- Lightweight or heavy-duty coiled cable options available
