Two-Way Radios for Schools

Portable Two-Way Radios (Walkie-Talkies) provide reliable, independent wireless communication during emergencies, functioning without the need for landlines or cellular networks. These radios enhance daily operations by enabling quick, real-time notifications for teachers, administrators, and maintenance staff. Whether it's an intruder alert, weather warning, water leak, schedule change, or security issue, two-way radios ensure that everyone stays informed and can respond immediately to keep students and staff safe.

Mobile Two-Way Radios for school buses keep drivers connected, streamline transportation management, and enable administrators to efficiently coordinate operations. GPS tracking is also available for enhanced route monitoring and safety.

HORIZON

Push-to-Talk over Cellular for Schools

- **HORIZON** Nationwide Push-to-Talk over Cellular (PoC) Network provides wide-area coverage using the campus Wi-Fi network and 4G/5G/LTE cellular networks and campus Wi-Fi networks. This enables both facility-wide coverage and student transportation communication and dispatching.
- **HORIZON** features a powerful dispatching application that provides instant group calling and individual calling along with GPS location tracking of school buses, maintenance teams, and security patrols.
- **HORIZON** PoC devices include light-weight easy to use devices, mobile radios for vehicles, and smart devices that run education apps.

TeamTalk™ Hands-Free Communication

Unlike two-way radios, **TeamTalk™** offers full-duplex, hands-free communication that allows simultaneous conversation amongst your coaching team. Perfect for small or large sporting events, **TeamTalk™** can be scaled to fit any sized coaching staff.

- Up to 9 full-duplex users and unlimited push-to-talk users
- Pairs with field-proven headsets and earsets
- FCC license-free cocommunication system
- No base station required
- Range up to 1000'
- Convenient USB charging
- Up to 12 hour battery life

Two Way Radio Accessories

Two-way radio accessories enhance communication performance and ease-of-use for your team. Hands-free operation is made simple with headsets and earpieces, ideal for busy teachers, while noise-canceling headsets ensure clear communication during crowded assemblies or sporting events.

Belt clips and carry cases keep radios secure and accessible without being intrusive. Spare batteries guarantee radios are fully powered and ready when needed most. Multi-unit chargers are available to conserve outlet space and streamline charging.

For mobile radios in buses, speaker mics provide a safer, more convenient way for drivers to stay in touch while keeping their focus on the road.
