

Talk Through Your Ears®

In-Suit Communication System

In-Suit communication for the world's most challenging environments

Revolutionary Technology for In-Suit Radio Communication

Talk Through Your Ears® provides clear radio transmissions, even in the harshest noise or PPE conditions. CavCom's specially engineered earpieces combine an in-ear microphone and speakers to offer clear voice communication, regardless of PPE. Hear and be heard clearly on your two-way radio with this lightweight, industry tough communication system. Communicate where you are, down range or in-suit with *Talk Through Your Ears®*.

Any Suit

Any Respirator

Any Radio

Talk Through Your Ears®

In-Suit communication system. Seamless radio communication, regardless of PPE.

Earsets

- Microphone and speaker located in earpiece
- Low-profile for compatibility with other PPE
- Choose custom or universal fit
- Hearing protection option (NRR 26/29/32)
- Volume-limited to reduce loud radio outputs
- Binaural (dual ear) reception for ultimate clarity

Two-Way Radio

- Connects to any two-way radio
- Quick disconnect radio adapter cable (upgrade radios at any time)

Control Unit

- Low battery alert
- Side-tone for monitoring own voice
- Removable 360-degree rotating clip
- Intrinsically safe option
- VOX (hands-free) option

Large remote PTT button
available
