

TeamTalk™

EMPLOYEE TRAINING COMMUNICATION SYSTEM

TeamTalk™ helps trainers and new employees overcome the challenges of communicating in the most extreme environments where high noise and PPE, such as respirators, can affect safety and training.

When hands-free communication is a must, TeamTalk™ allows users to communicate with each other live, without delay, and without having to press a button - just full-time talk/listen like a conference call. TeamTalk™ offers 4 different headset/earset accessories to ensure hearing protection and communication is maximized for the specific job at hand. TeamTalk™ can also be linked to a two-way radio, allowing trainers to communicate outside of their hands-free training group when needed.

FCC License-free Communication • No Base Station Required Convenient USB Charging • Range Up To 1,000 ft

Great Employee Onboarding
Can Improve Retention Rate by
82 Percent and
Productivity over **70 Percent***

* Glassdoor onboarding program research.
