

TeamTalk™

HANDS-FREE COMMUNICATION SYSTEM

TeamTalk™ helps crews overcome the challenges of communicating in the most extreme environments where high noise and PPE, such as respirators, can affect safety and productivity. When hands-free communication is a must, **TeamTalk™** allows users to communicate with each other live, without delay, and without having to press a button - just full-time talk/listen like a conference call. When live communication is not needed, **TeamTalk™** provides users with an alternative PTT button to transmit only when users desire. **TeamTalk™** offers 4 different headset/earset accessories to ensure hearing protection and communication is maximized for the specific job at hand. **TeamTalk™** can also be linked to a two-way radio, allowing users to communicate outside of their hands-free group when needed.

*FCC License-free Communication • No Base Station Required
Convenient USB Charging • Range Up To 1,000 ft*
